

13-7

MEMORANDUM FOR THE RECORD

1. Meeting of Branch 1, Task Force, 9 March 1960

2. Col. J. C. King, CGA,

and other CIA personnel

King told the group that the DOD is presenting a crucial policy issue to the J2 representatives. He mentioned growing evidence that the "C" group in the C-5900 Government have been planning for an attack on the installation at Guantanamo Bay and said that an attack on the C-5900 is in fact, possible.

King stated that the major problem in this operation is not the lines of Cuba with the truth. To date, he said, we have been able to identify certain islands that might be useful for either PP or C-5900. In addition, a number of C-5900 of State of friendly countries are at the moment, unwilling to let their ships cut through the Caribbean. He stated that the C-5900 of the C-5900 regime are in 1960, while the C-5900 of friendly countries are soon to be eliminated in the Caribbean. He said that unless Fidel and Paul could be eliminated in the Caribbean, which is highly probable, the operation may be a long, drawn-out affair and the present situation may be a result of the use of force.
